Objective:

Capital preservation and current income.

Strategy:

The **Short-Term Bond Fund** invests at least 80% of its assets in short-term bonds. Under normal circumstances the Fund's dollar-weighted average maturity* does not exceed three years. The Short-Term Bond Fund invests at least 65% of assets in bonds rated within the three highest grades (AAA, AA or A); and may not invest in a bond rated at time of purchase below the fourth highest grade (BBB).

*The sum of the market value of each bond times its number of years to anticipated maturity, divided by the portfolio's total market value.

Performance data quoted herein represents past performance which is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. Current performance may be higher or lower than the performance data quoted. Performance current to the most recent month-end can be obtained by visiting www.sextantmutualfunds.com or calling toll-free 800/SATURNA. The Adviser has absorbed, currently or in the past, certain Fund expenses, without which total returns would have been lower. The Fund cannot guarantee that its investment objectives will be met. Securities of the Fund are offered and sold only through the prospectus.

Please consider an investment's objectives, risks, charges and expenses carefully before investing. For this and other important information about the Sextant Funds, please obtain and carefully read a free prospectus from www.sextantmutualfunds.com or by calling toll-free 800/SATURNA.

Risks:

The value of **Short-Term Bond Fund** shares rises and falls as the value of the bonds in which the Fund invests goes up and down. Only consider investing in the Fund if you are willing to accept the risk that you may lose money. Fund share prices, yields, and total returns will change with market fluctuations as well as the fortunes of the industries and companies in which the Fund invests.

The risks inherent in the **Short-Term Bond Fund** depend primarily on the terms and quality of the obligations in its portfolio, as well as on bond market conditions. When interest rates rise, bond prices fall. When interest rates fall, bond prices go up. Bonds with longer maturities usually are more sensitive to interest rate changes than bonds with shorter maturities, such as those held by the **Short-Term Bond Fund**. The Fund entails credit risk, which is the possibility that a bond will not be able to pay interest or principal when due. If the credit quality of a bond is perceived to decline, investors will demand a higher yield, which means a lower price on that bond to compensate for the higher level of risk.

Morningstar is a leading provider of independent investment research on mutual funds and other securities. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% in each category receive 5 stars, the next 22.5% 4 stars, the next 35% 3 stars, the next 22.5% 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating for a fund is derived from a weighted average of performance figures associated with its 3-, 5- and 10-year (if applicable) Morningstar Rating metrics. The number in parentheses indicates the number of funds in the Short-Term Bond Category against which the Short-Term Bond Fund was rated.

All data, including performance, returns, rankings, ratings, assets and portfolio information is as of June 30, 2010 unless otherwise noted.
